PROFESSIONAL SUMMARY

Senior Software Engineer and Military Veteran with over 8 years of experience in designing, implementing, and optimizing microfrontend and API-driven architectures. I am a frontend expert and a React enthusiast, with hands-on experience in creating modular and responsive frontend components using React, Material UI, and other frameworks and libraries.

PROFESSIONAL EXPERIENCE

SENIOR SOFTWARE ENGINEER II

Newfold Digital   Feb 2016 - Dec 2023

- Managed story prioritization in Jira, collaborating closely with product, UX, and QA teams to ensure bug-free deployments to production. Utilized a Jenkins pipeline and AWS within the CI/CD process to facilitate seamless deployments.
- Conceptualized, built, and implemented standardized functional React Components.
- Orchestrated the development of a standardized Design System and reusable component library with Storybook integration.
- Leveraged front-end data caching libraries and methods (e.g. react-query) to optimize performance, showcasing various data states. Acted as the Front-End Subject Matter Expert, providing valuable insights and guidance to the team.
- Collaborated with UI/UX designers to transform wireframes and mockups into responsive, user-friendly interfaces for seamless cross-device experiences.
- Redesigned and developed large-scale web projects, including overhauling the front-end of our customer purchase flow and billing portal resulting in a mobile-responsive interface, and boosting conversions by over 5%.
- Worked on an Agile Scrum team building custom white-label microfrontend software.
- Contributed to Change Management processes through BitBucket/Git and managed issues efficiently using Jira.
